

Job Title – Plant/Generator Technician

Job type

Full-time

Full Job Description

Are you looking for a role where you can tackle the climate crisis and make a real impact on the future of sustainability?

Proelectric's next-generation technology is accelerating the change to a more sustainable future for businesses, communities, and the planet - and you can be part of that. So far our products have saved over 21 million tons of CO2 emissions from entering the atmosphere.

We are market-leaders at the forefront of solar technology, providing zero-carbon sustainable lighting, power and security to some of the UK's biggest industries.

Our culture is built around corporate social responsibility, being one of few UK companies to hold a gold CSR accreditation and the UK's most prestigious business accolade - a Queens Award for Sustainable Development.

Your Opportunity:

You have an exciting opportunity to join our factory team as a plant/generator technician. The role offers room for development, with plenty of variation and the chance to work on a variety of different solar based lighting and hybrid power generator products.

We are looking for somebody with a well-established plant/generator background who is passionate about providing quality service to the customer, has a real attention to detail and works well within a wider team of technicians to achieve a common goal.

Key Responsibilities in the Role:

- To play a key role in the production and maintenance of all solar based lighting and hybrid power generator products
- Carry out routine preventative maintenance, including servicing and inspections
- Action on-site diagnoses and repairs as required by the customer
- Ensure the customer is put first by adopting appropriate levels of care relative to the customer's needs
- Ensure the build quality, preparation and presentation of company assets are of the highest quality at all times
- Working closely alongside other team members to ensure all products are built, tested and commissioned in line with the customers requirements
- Adhere to health & safety requirements and environmental protocols by being compliant with correct PPE, method statements and risk assessments

Skills, Knowledge and Competencies Required:

- Experienced in either the productions or maintenance of plant/generator equipment within a similar field
- Good working knowledge of mechanical, hydraulic, and electrical systems
- Numeracy & literacy skills to level 2 or above
- Working knowledge of health and safety legislation, systems and procedures
- Excellent time, communication and workload management skills with the ability to work to strict deadlines

**Benefits:**

We offer several employee benefits including paid leave for volunteer work, birthday day off, plus 31 days holiday (inclusive of Bank Holidays) rising to 33 days after 2 years' service.

- Company events
- Company pension
- Cycle to work scheme
- Life insurance
- On-site parking
- Sick pay
- Private Medical Insurance (BUPA) qualifying period applies
- Share Save Scheme
- Charity Matching Programme

Schedule:

- 8 hour shift (07:30 – 16:00)
- 40 hours per week
- Overtime available where necessary/required
- Monday to Friday
- On call requirements may apply

Required:

- Minimum 2 years' experience in a related field/position
- Full UK driving license
